WORK EXPERIENCE

Auditor

2018

Eclerx, Chandigarh, India

- Due to my consistence performance and quality maintenance, I was assigned as a team lead and my role was to help and guide all the new trainees in my department.
- Worked efficiently by putting in all the efforts to achieve the expectations of the organization.
- Listened incoming calls made by the customers to Comcast Call Centre for help and support.
- Achieved the daily audit targets along with, maintaining quality targets as well.
- Also bagged the star performer award after just three months of work and got appreciation from my manager.

PROJECTS

1) ABC Cinemas:

- Technologies used: HTML, CSS, JAVASCRIPT, BOOTSTRAP (CSS framework)
- This website is basically fetching an API from the movie database.
- This website displays the movies that are currently playing in North America. Also, when a user clicks on the more info button, it displays the modal showing the details of a particular movie.
- It is a website built by consuming a restful API using JavaScript and CSS framework i.e., Bootstrap.
- **GitHub repository of the website:** <https://github.com/Sukhweb/abc-cinema.git>

2) Kijiji clone:

- Technologies used: HTML, CSS
- It is a multi-page website. It has a landing page, log-in page, and listings page.
- This website displays the listing of cars and user can filter and search car according to the brand name of the car.
- It is a dynamic website built using JavaScript and CSS framework i.e., Bulma
- **URL of the website:** www.kaursukhweb.com

3) Indo-western jewels:

- Technologies used: HTML, CSS, JAVASCRIPT, BULMA (CSS framework)
- It is a single-page scrolling website
- It is a static website built purely using HTML & CSS without the use of any framework.
- **URL of the website:** <https://indo-western-jewels.github.io>
